DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5 through 8 and 10 through 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 5 recites the limitation "the starting the operation" in line 4. There is insufficient antecedent basis for this limitation in the claim.

4. Claim 10 recites the limitation "the detectors" in line 11. There is insufficient antecedent basis for this limitation in the claim. Which detectors are being referred to? Is it all of the above mentioned detectors, only some of them, or additional ones not mentioned above in the claim?

5. The remaining claims are rejected for being dependent on an indefinite claim.

6. Claims 1-4, and 9 are allowed.

7. Claims 5 through 8, and 10 through 18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

8. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not disclose calculating an over-excitation period adjusting value of the solenoid valve when the target duty lies in the predetermined range. The closest prior art is Ueda, 6208498. Ueda calculates an over-current termination point

based on the temperature and voltage which are used as an indicator of the current in the solenoid. Ueda doesn't calculate a base period for the over-excitation and then adjust it when the target duty is within a predetermined range.
